

Depauville Sewer Meeting
May 7, 2015

Call to order @ 09:03

- Valves- Having problems with the valves that distribute to the beds. They are sticking and not shutting off tight. The rods that operate them have deteriorated to the point where they bend rather than operate the valve. It is the suggestion of the board to have them replaced.
- Pomerville- has the contract for the pumping of the tanks- Question on the duration of this contract. It may be in the Highway records and if not then the Town records will show it.
- Flushing of the lines- Question as to when they were done & due again- done normally late summer.
- Holding tanks by the Library- to be checked for silt and debris to see if they need pumping.
- Beds will be raked and attended to the first time in the month of May. Usually done 5 times a year.

It was in full agreement of the Board not to have the summer meeting. The next meeting is on Sept 3rd.

Meeting closed at 09:30
